

APPLICATION FOR DRIVEWAY AND/OR DITCH ENCLOSURE PERMIT

OFFICE OF THE MIAMI COUNTY ENGINEER
2100 N. County Road 25-A, Troy, Ohio 45373
Telephone: (937) 440-5656 Fax: (937) 440-5659
E-mail: mce@co.miami.oh.us

Paul P. Huelskamp, PE, PS
Miami County Engineer

The applicant does hereby make application to install:

- Residential Drive
- Field Entrance for farm equipment
- Commercial Drive
- All Purpose Farm Residence Drive
- Ditch Enclosure

LOCATION: Township _____ Sec. _____ Town _____ Range _____
Road Name: _____

DETAILS: _____

Is there already an address assigned for this location? Yes No
If yes, what is it? _____
If no, your new address is: _____

The Property Owner does agree to the following conditions:

1. During the progress of the work, such barriers shall be maintained as may be necessary for the protection of the traveling public.
2. Traffic shall be maintained.
3. The permit holder shall be responsible for all damages to persons or property due to or resulting from any work performed under this permit.
4. The berm of the existing road in the driveway area shall be excavated to a minimum of 6 inches to provide satisfactory granular base material. If a concrete drive is to be installed on a County road, the concrete shall be terminated three feet from the edge of pavement.
5. Pipe or conduit shall be installed to the grade line of ditch.
6. If any grading or construction performed under this permit interferes with the drainage of the highway in any way, it shall be the responsibility of the permit holder to correct same to the satisfaction of the County Engineer.
7. It is agreed that the maintenance and repair of the above installation shall be the responsibility of the property owner and shall be maintained so that the drainage of the road shall not be impaired.

ENGINEER'S COMMENTS: _____

Date: _____

For Paul P. Huelskamp, PE, PS, Miami County Engineer

This permit is valid for 12 months from date of approval and is non-transferable to other parties.

*This application when signed by the Miami County Engineer and the Miami County Commissioners shall serve as a permit.

Miami County Engineer's Office

Instructions for APPLICATION and INSTALLATION of DRIVEWAYS

1. Applicant shall place a stake at the centerline of the proposed driveway, approximately 10' off of the edge of the pavement, prior to site inspection.
2. This office will inspect the site and determine the size of the culvert needed, if any. This permit will then be mailed to the address and person listed on the front of this permit. If a pipe is required, the pipe will be installed per the requirements of this office. This office will also provide advice on the installation.
3. It shall then be the responsibility of the property owner or his agent to install the pipe at the grade and location as established by this permit and this office. If the County Engineer anticipates a setback of the existing ditch line, it shall be the responsibility of the applicant to grade from the existing side ditch to the new culvert.
4. If a concrete drive is to be installed on a county road, the concrete shall terminate three feet from the edge of the pavement. After the concrete is in place, the applicant shall notify this office and asphaltic concrete will be placed by County crews in the approach between the road and the drive. This office also handles driveway permits on township roads but **does not** build approaches on township roads. If your driveway is on a township road, you need to contact your township trustees to see how and if they provide this service.
5. When the driveway is completed, you should call the County Engineer's Office for final inspection.
6. Mail box supports shall not be larger than 4" x 4" timber or 2½" standard wall steel pipe. Other supports having a cross section of equal or less breakaway characteristics may be used with permission of the County Engineer.
7. Prior to commencement of any work (including, but not limited to, driveway construction), the applicant and/or property owner shall contact the Miami County Planning and Zoning Office to determine if a FEMA Flood Plain Permit is required.
